### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3723

**DETAILED ACTION*****Specification***

1. The disclosure is objected to because of the following informalities: page 1, line 4, --now US Patent No. 6,796,889--, should be added, same page line 10, "In U.S. Patent application serial number 09/738,305" should be changed to, --In U.S. Patent No. 6,413,157--.

Appropriate correction is required.

***Claim Objections***

2. Claim 2 is objected to because of the following informalities: "the apertures in the sanding pad assembly" as recited in the last line should be changed to "aperture in the backing pad" since the assembly (e.g., pad, frame...) does not have holes. It is noted 112, 2<sup>nd</sup> paragraph rejection is not applied at this point, since scope is clear per specification as originally filed.

Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by either Huang (4,930,264) or Marton (4,616,449).

Both Huang and Marton disclose all of the limitations of claim 1, i.e., a sanding pad assembly having a backing pad (denoted by forward slash hash-marks); a plurality of

Art Unit: 3723

apertures (71, 45 respectively) extending through the pad; an annular frame (6, 42 respectively) having a circumferential edge defining in part a back wall having an opening.

Regarding claim 2, both Huang and Marton meet the limitations, i.e., sanding disk (denoted by back slash hash-marks) having hole aligned with the holes in the pad.

### ***Conclusion***

5. Prior art made of record and not relied upon are considered pertinent to applicant's disclosure. Sun et al., Manor et al., Takashima, Marton and Emmons are cited to show related inventions.
